I've added the base URL to the Trusted Sites group policy – and it's linked to the Region6 > Laptops OU.

All OUs (Addison, Dallas, REOC, etc) will inherit this new setting. A “gpupdate /force” may be useful to make it happen right away on the client computer.

Here is a list of the Region6-specific Trusted Sites as it stands now (plus any EPA-wide trusted sites that aren't pictured here). Let me know if you have any trouble with it.

Thanks....Mark H.

'morning...

Do you have any idea what the URL is that's giving them problems?

**From:** Huff, Mark  
**Sent:** Friday, August 21, 2015 9:48 AM  
**To:** Jackson, Devron  
**Subject:** RE: OSC and IE issue on mine site

I can do it. I setup an trusted sites Group Policy for our R6 users a while back, so the bulk of the work is done.

The user(s) will have to be on the LAN to get the new group policy setting – if they're in the field , it won't help them until they return (Juniper won't pass GPO settings)

Get me the URL and I'll add it.

Morning. Any clue on who I would talk to about getting a site added to EPA trusted sites?

Devron,

I did not get word on how to request site be added to trusted sites and I saw Erik on the way out yesterday.

Please get with Huff on who to get site link to for adding to trusted and drop email to Ken and Erik on using Chrome and that we requested add to trusted sites but no promise.

Thanks,
